

GT Bottom Line

GT Bottom Line is an add-on feature to GameTime ScriptPRO. GT Bottom Line is an application that loads on top of all other programs and is used by operators that already have a computer which runs their primary application (ex: audio/video). This application shows the next three queued elements in real time.

If a user has the permissions to view GT Bottom Line, the download will be available in the account settings.

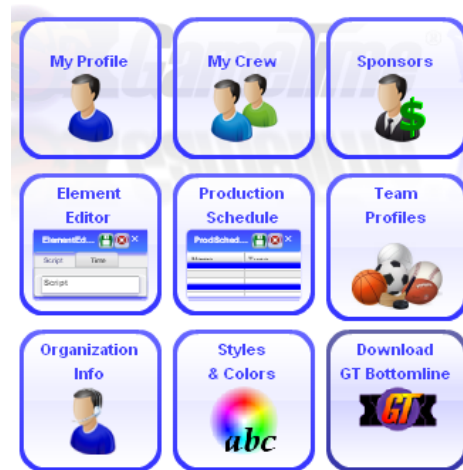

- Click on Settings
- Click on the Download GT Bottom Line Button
- Click Install Now

- Follow directions through the install process
- A short cut icon is added to your desktop

- Click the short cut icon
- Enter your Username and Password
- Select a game
- GT Bottom Line displays
